ABOUT ME

Software Engineer with a Masters in Web Engineering from the Polytechnic University of Madrid and a passion for Computer Science. I have worked in the analysis, design and architecture of web applications for important companies in sports betting and banking sectors.

In the last years I have oriented and developed my professional career towards the banking sector along with the development of software and web engineering, realizing successful projects across leading websites and pioneers in the current market.

I have been also working as technical leader managing teams and people. As manager, I've had to gather metrics, motivate people and drive the team to a common target.

KAIZEN (Today better than yesterday, tomorrow better than today)
